Annie Zimmerman, DVM, MS-LAM, LAT
Associate Pathologist

~5 Years of Experience

Areas of Expertise
- IHC and IF
- *In Situ* Hybridization
- Image Analysis
- Ocular
- Efficacy
- Safety Assessment

My Jam
- Reading
- Video Games

Annie Zimmerman joined Inotiv in April 2021 as an associate pathologist. She brings her experience in IHC, IF, and all things related to image analysis. She currently supports these areas through creation and validation of image analysis algorithms. In addition, Zimmerman serves as a major resource for tissue sectioning and staining quality control. Beyond technical excellence, she has strong critical evaluation skills, envisioning process improvements and consulting on study designs.

Dr. Zimmerman comes well-experienced to Inotiv's team. Starting with a B.A. in integrative biology, she began her career at University of Arizona in animal care. She would then earn both her DVM and master's degree in laboratory animal medicine from Tufts School of Veterinary Medicine in 2017. After, she participated in her residency at both Michigan State University and Charles River Laboratories. More recently, she worked at HistoTox Labs, Inc. as an associate pathologist before joining the Inotiv Boulder location.

We are happy that such a successful up-and-coming pathologist has joined Inotiv's roster. Her expertise in image analysis provides our clients with industry leading technical capabilities and valuable strategic insights.
