- > Immunohistochemistry
- > Neurology

My Jam

- > Life Coach
- > Reading & Writing
- > Mentoring
- > Teaching

Barbie J. Gadsden joined Inotiv in April 2021 as senior pathologist, bringing over 20 years of experience. She has a wide range of expertise, from ocular toxicity to gene therapy to immunohistochemistry. Her diverse experiences give Inotiv the ability to adapt to the needs of our clients.

Dr. Gadsden comes highly credentialed. A master's degree and DVM were not enough for her, so after she underwent her pathology residency at Michigan State University, she completed her Ph.D.. Her ambition and ability have served her well in multiple fields. Starting in education, she moved into a pathology career, reaching the position of principal pathologist at MPI Research and veterinary pathologist at Charles River Laboratories.

We are glad to have such a talented individual on our team at Inotiv. Between her pathology and education abilities, she gives Inotiv an industry-leading edge in our pathology staff.
