

ABOUT

John M. Kreeger, DVM, Ph.D., DACVP Scientific Director, Pathology

John M. Kreeger joined Inotiv in April 2020, bringing an impressive 30 years of research experience. He provides Inotiv with a wealth of industry experience both at the bench and at the leadership level. His diversity of experience is unmatched, from the zebra fish model to antibody-based therapeutics. Inotiv is proud to have such a well-rounded individual as our scientific director, pathology.

~30 Years of Experience

Areas of Expertise

- > Rheumatoid Arthritis
- > Osteoarthritis
- > Autoimmune Disease
- > Nucleotide Therapeutics
- > Antibody-Based Therapeutics
- > Biologics
- > Small Molecules
- > Management
- > Immunohistochemistry
- > In Situ Hybridization
- > Image Analysis
- > Discovery Phase Development
- > Mouse Tumor Models
- > Hepatic Lipidosis
- > Zebra Fish

My Jam

- > Hiking
- > Fishing
- > Fitness (Running, Biking)
- > Movies

In academia, Dr. Kreeger earned both his Ph.D. and DVM from Louisiana State University, moving on to become an NIH postdoctoral fellow at Colorado State University. He then moved into pathology, eventually becoming an associate professor veterinary pathology at University of Missouri where he reached tenure.

Here he turned to industry, joining Pfizer, where he spent the next 16 years as a successful research fellow, including five years as the director, Drug Safety R&D, in the investigative pathology laboratory.

Now at Inotiv, he brings with him both his experience in industry and academia to inform our industry-leading and expanding pathology services.
