

ABOUT

Laura L. Hoon-Hanks, DVM, Ph.D., DACVP

Veterinary Pathologist

Laura Hoon-Hanks joined Inotiv in May 2021 as a veterinary pathologist. She held the same position at HistoTox Labs, which was acquired by Inotiv in May 2021.

She provides anatomic and digital pathology support for discovery and preclinical drug research in animal models. Her technical performance is excellent, including microscopic evaluation and interpretation of tissue sections, manual evaluation and digital image analysis techniques, and data analysis. From this, she communicates the findings with clients for GLP and non-GLP studies. In addition, she provides training, technical and scientific guidance and leadership to laboratory staff.

Dr. Hoon-Hanks has earned her credentials in pathology, starting with her DVM from Colorado State University. She did her veterinary anatomic pathology residency at the same institution, then completed her Ph.D. in pathology and infectious disease. She is an asset to Inotiv's pathology services, especially in laboratory technique for animal models.

Areas of Expertise

- > Infectious Disease
- > Cosmetic Fillers/Implants
- > Immunohistochemistry
- > Image Analysis
- > Discovery Phase Development
- > Good Laboratory Practice
- > Auto-Immune Disease
- > Animal Models of:
 - Fibrosis
 - IBD and Colitis
 - Cirrhosis

My Jam

- > Mountain Biking
- > Whitewater Rafting
- > Hiking
- > Snowboarding
- > Baking
- > Reading
